Handcrafted Fine Jewelries

## COLLECTIONS AND INLAY GUIDE

*The deepest inlay for the most precious gems.*

## JEWELRY MADE FOR WOMEN WHO'VE MADE THEMSELVES.

We believe fine jewelry should reflect the character of its wearer. At Kabana, that means our jewelry must do more than just look beautiful. It must be crafted with integrity, radiate with a personality all its own, and carry within it unparalleled depth.

### OPAL COLLECTION

### OUR COMPANY

Founded in 1975 by Stavros Eleftheriou, Kabana continues to be an industry leader in craftsmanship and design. Using the finest materials found in nature, our gemstones are cut, shaped and polished completely by hand and inlaid using only solid pieces, making for a finished piece of jewelry that not only looks magnificent, but also holds exceptional substance and quality that can be distinguished by touch alone.

*Kabana is one  
of very few fine  
jewelry designers  
and manufacturers  
that can claim  
its creation to be  
entirely made in the  
USA.*

**LUMIÈRE  
COLLECTION**

*inspired by the gothic  
architecture of Europe's  
great cathedral windows*

**RIVIERA DUSK  
COLLECTION**

*inspired by the Mexican  
Riviera at sunset*

**ROSE COLLECTION**

*spiny purple oyster with black  
and pink mother of pearl*

Our solid inlay creates a gemstone that rises above the gold, forming a dome, creating Kabana's signature look that is recognizable around the world.

## OUR PROCESS

Only our most skilled jewelers are qualified to inlay a Kabana piece. Each gemstone is meticulously sculpted by hand to fit perfectly into its channel, and then thoroughly hand-polished to a seamless finish.

## OUR MATERIALS

We use responsibly sourced and 100% organic stones and natural gems. All Kabana jewelry is produced in 14 or 18 karat yellow, white and rose gold. Our diamonds are round brilliant full cut, SI1 clarity and G-H color, assuring that even the smallest diamond sparkles most intensely.

**BLUSH COLLECTION**  
*rose gold with pink mother of pearl*

# GEMSTONES

## AUSTRALIAN OPAL

Often referred to as the captive rainbow, opal is an extremely rare and precious gemstone. Kabana uses Australian Crystal Opal, known for its brilliant hues of greens, blues, yellows, reds and oranges. Just like the women who wear our jewelry, no two opals are alike.

## ONYX

Onyx has been used in jewelry and ornamental objects for centuries in cultures around the world. Its deep polish and concentrated opaqueness create an understated elegance that spans all of Kabana's collections.

## MOTHER OF PEARL

Mother of Pearl refers to the shell in which the pearl is born, exhibiting its same visual characteristics. Our jewelry features only the finest varieties of this precious material.

### PINK *mother of pearl*

Kabana sources this vibrant gem with the richest pink colors from the pristine waters of North America.

### BRONZE *mother of pearl*

The iridescent bronze palette hosts flashes of yellows, reds and pink highlights. Only found in the exotic waters of the South Pacific.

### BLACK *mother of pearl*

This shell produces the famous Tahitian black pearl. The rich black body color also exhibits hues of silvery gray, green and even pink.

### WHITE *mother of pearl*

The mother of one of the world's most rare pearls, the white pearl, which comes from the South Seas of Asia.

## LAPIS LAZULI

Adorning the royal and the revered for centuries, this uniquely blue gemstone, original pigment source for the color ultramarine, evokes an enchanted sky shimmering with the golden stars of its pyrite inclusions.

## SPINY OYSTER

The bold reds, oranges and purples of this unique oyster can only be found in the Mexican Riviera and Baja California. Its brilliant colors are determined by the spiny oyster's diet, making each piece one-of-a-kind.

## TURQUOISE

The pure and vibrant robin's egg blue of Sleeping Beauty Turquoise is unmatched by any other turquoise. With little matrix or veining it is reminiscent of the southwestern sky of Arizona where it is mined.

*Using the finest materials found in nature, our gemstones are cut, shaped and polished completely by hand and inlaid using only solid pieces, making for a finished piece of jewelry that not only looks magnificent, but also holds exceptional substance and quality that can be distinguished by touch alone.*
